

JACKSON STEM

Jackson Middle School is a rural public middle school located in Jackson, South Carolina. The school facility was built in 1955 due to the construction of the Savannah River Plant. It was converted to a middle school in 2011.

Our current school population of 351 students comes mostly from the Jackson and Beech Island areas. Our student body consists of 54% Caucasian/white students, 36% African American/black, and 4% Latino/Hispanic, and 6% Mixed Race and Other Nationalities.

Students are allowed to pursue their interests during STEM Club Days, Advisory Period, or after school. After-
